

EDUCATION

Imperial College London

Master of Public Health: Infectious Diseases and Global Health

London, UK
October 2023

Honors: Graduated with Merit

Relevant Coursework: Statistical Thinking and Data Analysis, Global Health Challenges and Governance

Rutgers University

Bachelor of Science in Public Health

New Brunswick, NJ
August 2022

Certificates: Global Health and Health Policy, Women's Health and Health Disparities

PROFESSIONAL EXPERIENCE

Community Health Care Association of New York State

Program Coordinator

New York, New York
September 2024 – Current

- Conduct data collection, cleaning, and analysis of population health datasets across 10+ FQHCs to evaluate and improve program outcomes, inform 8+ PDSA cycles, and refine multi-year project goals, contributing to improved chronic disease screening performance and health equity initiatives.
- Develop quality improvement reports, data dashboards, and visualizations for senior health officials and stakeholders using Excel, Tableau, Python, and DRVS (Azara Healthcare) to support and grow performance monitoring and decision-making.
- Synthesize complex public health data into over 25 research briefs, memos, and stakeholder presentations, converting findings into practical recommendations that support more than 10 health center projects, multi-year grant proposals, and reporting efforts.
- Facilitate and engage in over 100 stakeholder meetings, webinars, and on-site health center community outreach initiatives to improve population health and health awareness, enhance data transparency, and align multi-year project objectives.

Rutgers University

Data Analysis Research Assistant

New Brunswick, NJ
September 2021 – August 2022

- Investigated patterns of co-occurring substance use disorders — alcohol, opioids, and cannabis — across the lifespan using a U.S.-representative sample, contributing to a study examining how age moderates dual-diagnosis prevalence and clinical risk.
- Performed advanced statistical analyses on datasets from 1,000+ individuals using SPSS and SAS, applying multivariate regression and data visualization to generate actionable insights into behavioral health outcomes.
- Managed a literature database of 300+ sources in Zotero, executing rigorous protocols to maintain 100% data quality and methodological accuracy across multiple research projects.
- Presented analytical findings through posters, reports, and visualizations at university-run meetings: "Characterizing Co-Use and Dual Substance Use Disorder among Alcohol, Opioids, and Cannabis: Differences Across the Lifespan in a U.S. Representative Sample."

Secaucus Health Department

Public Health Analyst Intern

Secaucus, NJ
November 2020 – January 2022

- Researched and analyzed population health data using SQL and Excel to uncover trends and support targeted interventions for COVID-19 prevention and chronic disease control.
- Directed project coordination and grant writing for the Secaucus Coronavirus Vaccine Site, aligning funding, operations, and stakeholder engagement to support vaccination of more than 75% of the local population.
- Served as a liaison between government agencies, senior management, and community stakeholders, communicating evolving COVID-19 regulations to 22,000+ residents via telecommunications, web updates, and newsletters.
